Local Rink Does Well at Calgary Bonspiel

Advancing to the final stage of the Brier competition Saturday, Gordon Purvis' Rink recorded wins over Bill Kemp of the N. H. Club, Calgary, and J. A. McGhee, of Didsbury. These rinks were tied for leadership of their division.

The local boys have indeed made a good showing and their further efforts are being watched closely.

Personnel of the rink is as follows: C. Becker, G. Purvis, Chas. Fox and W. J. Wood.

In the final games played Tuesday, the boys unfortunately lost.

Joint Services of the Anglican and United Churches, for the Old Timers, will be held in the Anglican Church at 3:00 p.m., Sunday.

Around Town

Tuesday's storm played havoc all over the district, blocking roads right and left. The afternoon south-bound bus got as far as a mile south of town and had to return. In conversation with the Greyhound Officials, we learn that the roads north were fast filling up, and that traffic either north or south would be held up.

Colonized Printing Satisfies

CARD OF THANKS

We take this opportunity to express our appreciation and thanks for the many kindnesses extended to us during our recent sad bereavement.

(Mrs.) Mary R. Goldie
Isobel Goldie
Gavin Goldie

Skating between events and afterwards was indulged in, to music supplied by Bannister Loudspeaker Microphone Systems, with Bert Bannister, E. Tweddle and L. Lennon at the mike.

Mrs. S. Walker, Corp. D. Cameron and G. Y. McLean acted as Judges for the Costumes.

Everyone had a good time and a repeat later on would be an A-1 idea.

The Enquiring Reporter Says . . .

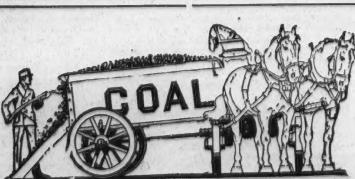

The local rinks, scheduled to play at Cartstairs Tuesday afternoon, had to call off on account of road conditions.

William Murdoch and Ken Borbridge had a trying experience last Saturday in the storm. They became snow-bound and had to do some intensive shoveling, with the result that Bill suffered frost-bite to his arm and face, and Ken to his feet and face. Best wishes for recovery is extended.

February 3rd is a Wednesday, and as well as Oldtimers Re-Union day, it is also a weekly half-holiday in town. To accommodate visitors from the country and elsewhere, the stores will remain open all day Wednesday, February 3rd, so when attending the Oldtimers doings, remember the stores will be open for your convenience and ready to serve you.

Should the Oldtimers Re-Union go ahead as planned, for February 3, Stores will remain open all day.

Grand Ice Carnival January 22, Huge Success

The Ice Carnival, sponsored by the Village on Friday, January 22, was a huge success, both financially and in attendance.

Broomball between Cartstairs and Crossfield young ladies resulted in a win for the former by two goals to nil, scored in an extra period. Miss E. Beckner, as captain, received the prizes, half a dozen cups and saucers.

A nice game of Pee Wee, between the locals and Cartstairs resulted in the Home Boys running out easy winners by a score of 5 to 1. Goals were obtained by J. Fleming (3) J. Stevens and E. Hopper. Our boys were vastly superior in every way, and if A. D. Stevens can spare the time to handle these lads regularly, he has splendid material to work on. How about it Stevey. Each winner received a knife.

Costume prizes went to the following:

Youngest skater	Larry Anderson
Oldest skater	T. Tweddle
Girls,	Maxine Lair
Boys,	Elsie Mossop
Ladies,	Mervyn Patmore
Comics	C. Carmichael & D. Ryan
	Mrs. M. McMaster
	D. Stevens & Co.
	Mrs. D. Carmichael & Mrs. R. Amery.

Races resulted as follows:

Children	Tiny tots	Bruce Wood
Girls	Patsy Stevens	N. Fleming
Boys	M. Wickerson	E. Williamson
	A. Sharp	
High School Girls	Arlene Amery	Adeline Carmichael
Boys	S. Sterling	B. Amery
Puck carrying Boys	B. Amery	G. Fleming
Men	E. McLeod	E. Hopper
Girls Relay	E. Becker	A. M. McFarlane
	M. Donnelly	
	Cartstairs	

The Wardens report showed about \$11.00 in liabilities, with enough money in the treasury to pay same.

Under new business, all the officers were re-elected, both Wardens and vestry. Discussion then took place on the property, some thinking of painting the church and rectory, others of pulling the present barn down. It was finally decided that the offer of the Ladies of the church, who had some money on hand, accepted, and a garage 12x20 be built in place of the barn.

The meeting then adjourned, after which coffee and sandwiches were served.—Contributed

Local Bronco Buster Again Stars in U.S.A.

Pete Knight, of Crossfield, added another championship to his long list of rodeo honours, when he stayed aboard 'Desolation' to win the bronco busting championship of the National Western Horse Show and Rodeo at the final performance, Saturday night, at Denver, U.S.A.

Church of the Ascension Holds Annual Meeting

The annual meeting of the congregation was held in the armouries on Thursday, January 21st, at 8:00 p.m. Owing to the bad roads, only a fair number was present. Reports were heard from the Wardens, Guild, Junior W. A. and the Sunday School, showing splendid work done and balance on hand. The Guild report showed that they had paid an assessment of \$55.00; paid for janitor work \$35.00 and transportation for the rector \$42.50. The Sunday School, along with Mrs. Currie, Superintendent, was congratulated on its splendid financial statement and work done. The Junior W. A. report showed they had given \$16.85 to relief; provided the church with some new prayer and hymn books; contributed towards the new circulating heater and paid all Calgary dues, as well as giving the Wardens \$10.00 towards general expenses of the church. The Wardens report showed about \$11.00 in liabilities, with enough money in the treasury to pay same.

Under new business, all the officers were re-elected, both Wardens and vestry. Discussion then took place on the property, some thinking of painting the church and rectory, others of pulling the present barn down. It was finally decided that the offer of the Ladies of the church, who had some money on hand, accepted, and a garage 12x20 be built in place of the barn.

The meeting then adjourned, after which coffee and sandwiches were served.—Contributed

Town Authorities Study Facilities for Auto Camp

With a season of greatly increased tourist traffic about to open, the question of auto camp accommodation is perplexing municipal authorities in some parts of Alberta.

Officials of the Alberta Motor Association for some time have been drawing attention to the great need of proper camp facilities. They have shown that steps should have been taken long ago to prepare for the flood of tourists, the beginnings of which are on the cards for 1937.

Taking Edmonton as an outstanding example of a centre that has been preparing for the motor tourist rush, one finds that it is hoped to spend about \$18,000 on auto camp improvements in the next 12 or 18 months.

Camp accommodation at the capital city was taxed at intervals during the past year.

During the past season, this camp had a revenue of \$3,250, while, after making some improvements, there was a net profit of \$500.

Towns and smaller cities located on main highways should act now to build up their auto camps if they want to attract a flow of visitors, it is claimed.

When a good camp is available, thousands of dollars are spent by tourists in the community which the camp is designed to serve.

The dollars spent in improving and modernizing the auto camp will be returned to the community three-fold, possibly more. When

Robert Gardiner Re-elected President

Robert Gardiner was unanimously re-elected President of the United Farmers of Alberta for a seventh term on Wednesday.

Henry E. Spencer, of Edgerton, former member of parliament for Battle River, and a member of the U.F.A. Central Board, whose name was placed in nomination, immediately withdrew, declaring that he had "worked so long with Bob Gardiner at Ottawa, and was so thoroughly familiar with the great work he had accomplished that he would not care to oppose him."

Tourists plan their summer tours, let them feel that their camping needs will be supplied in comfort and with modern facilities in Alberta.

Here's the Modern Way to Help END A COLD Quicker

The 3-Minute VapoRub Massage

Massage VapoRub briskly on the throat, chest and back (between and below the shoulder blades). Then spread it thick over the chest and cover with warm cloth.

Almost before you finish rubbing, VapoRub starts to bring relief two ways at once—two direct ways:

1. Through the Skin. VapoRub acts direct through the skin like a poultice or plaster.

2. Medicated Vapors. At the same time, its medicinal vapors, released by body heat, are breathed in for hours—about 18 times a minute—direct to the irritated air-passages of the lungs and bronchi.

This quick, poultice-and-vapor action loosens phlegm—relieves irritation—helps break congestion.

During the night, VapoRub keeps right on working often, by morning the worst of the cold is over.

Avoids Risk of Stomach Upsets

This safe, external treatment cannot possibly upset the stomach, as constant internal "dosing" is so apt to do. It can be used freely, as often as needed, even on the youngest child.

Now White—Stainless

Thanks to a new process, VapoRub is now made to your exact taste form. Only one color is removed; it is the same VapoRub—the same formula and the same effective double action.

VAPORUB**

Values In Higher Education

Of what value is a University education?

This is not a new question but it is one which is frequently raised and perhaps more so in the past few years than in any similar period in the past.

It is a question to which no hard and fast answer, unanswerable as the laws of the Medes and Persians, can be given. It is one, however, which many parents, who have scrimped and sacrificed many of the pleasures, yes, and even the necessities of life to send one or more offspring to an expensive fount of wisdom, must have asked themselves and are still asking themselves, in the light of subsequent results.

Theoretically, of course, there is only one answer to the question. In the educational cloisters there is strongly represented a school of thought which firmly adheres to the doctrine that no one can get too much education, that a University course cannot be otherwise than beneficial and that no one can possibly take the training which leads to a sheepskin parchment without reaping lasting benefits, material, social and cultural, thereof.

On the other hand, there is a growing body of opinion that is not prepared to subscribe in toto to this belief, while there are some who go even farther and assert emphatically that not only is a University education a waste of money, but that it is actually detrimental in the after-struggle to carve a niche for oneself in the world of business affairs.

Incidentally, among the members of the intelligentsia, the percentage of boys and girls who have seen their offspring leave these halls of learning, presumably a finished product, only to find there is no place for them in the commercial sphere, or in the alternative, one which does not measure up to the attainments of the applicant, while lads and lassies who stepped on the low rungs in office or store as public or high school neophytes are at least making a living, even though a meagre one, and some of them moving upwards on an executive's desk.

But even after making allowance for what is presumably the temporary effect of depressed conditions the same proponents point to the large number of so-called self-made men who to-day are leaders in their respective business spheres in comparison with the number of University graduates occupying similar posts, in support of their contention that higher education is of little or no value in post graduate life, except among the professionals.

The present day tragedy of the unwanted varsity graduate is at least to some extent a corollary of the economic and agricultural depression and its aftermath. Where this is not the sole reason for their plight, other answers must be given to the question of the why and the wherefore.

As is so often the case in attempting to answer a general question, the truth is not to be found in the viewpoint of the extreme dogmatist at either pole. For few problems is there a "yes" or "no" solution. There are conditional clauses and individual factors for which provision must be made in answering almost any question of sweeping application. And it is so in this case.

Setting aside for the moment the effect of temporary economic difficulties, it can be said without fear of supports contradiction that the value of a University education to youth depends on the ability and aptitude of the applicant for admittance, the avowed purpose of the institution itself, the fitness of its aims and the manner in which it discharges its obligations.

In other words if a full harvest is to be borne, the student soil must be both receptive and productive and the institution must be ready and able to plan the right kind of viable seed in the right manner for that particular soil.

In far too many cases one or other of these requisites is lacking. The student may be mediocre or lack capacity to take advantage of the facilities offered or, on the other hand, the institution may not be geared up to provide the particular type of training best suited to the requirements of the student. In other instances the student's aspirations are immature. He has no particular goal in sight and in such cases waste of time and money are the inevitable result.

Before deciding to make great sacrifices to their own detriment or to the disadvantage of other members of the family to send a son or daughter to a university, parents would be well advised to make a careful and impartial analysis of the ability, the capacity and the aspirations of the would-be college graduate, and having done this to make sure that the institution to which he or she is to be sent fulfills the requirements, lest disappointment ensue.

Another Sugar Beet Payment

Another \$35,000, representing 40 cents a ton, will have been paid 1,000 sugar beet growers of southern Alberta. First bonus on the 1936 crop this brings payments to date to \$5.52 a ton against final payments of \$3.82 a ton for the 1935 crop.

Bolivia has the smallest stamp of currency in the world.

If things are not coming your way—get in their way.

Stop Itching

TORTURE IN A Minute

For quick relief from the tickling of insects, blisters, rashes, etc., nothing is better than Phillips' Milk of Magnesia. It is easily absorbed and does not irritate sensitive skin. It is easily applied and stays on. It is non-greasy and stays dry. It is the most intense tickling止perative ever made. Ask for D. D. D. PRESCRIPTION

Germans Keeping More Bees

German bees are being pressed into service in the war-making production campaign. "One bee to each sack," has been the beekeepers' slogan. A preliminary bee census indicates an increase of 250,000 swarms, or 12 per cent, as compared with last year. This will mean, it is said, that nearly one-half the quantity of honey heretofore imported will be produced at home.

No two orbits of planets lie in the same plane. Using the orbit of the earth as a standard, the other planets travel in planes tipped at angles ranging up to 10 degrees.

On a long march, penguins break the monotony of walking by tobogganing or pushing themselves along on their stomachs.

Coronation Committee

Name Representatives On Commission For Empire Units

London.—Canada's representatives on the commission responsible for the forthcoming coronation of King George VI were announced as Prime Minister Mackenzie King, Hon. Vincent Massey, Canadian High Commissioner, and G. F. Vanier, secretary of the high commissioner's office.

The United Kingdom will be represented by members of the coronation committee of the privy council.

Prime Minister J. A. Lyons, High Commissioner Bruce, former governor-general Sir Isaac Isaacs, Sir John Latham and Sir George Rich will act for Australia.

New Zealand's representatives will be Prime Minister Nash and High Commissioner Jordan.

The South African delegation, previously announced, is Premier Herzog and Charles de Water, the high commissioners.

The Duke of Gloucester, brother of the king, will be chairman of the commission.

Had Rare Experience

U.S. Aviator Saw Two Sunrises In One Morning

One aviator saw two sunrises on New Year's Day. At 6 a.m. Major Alford J. Williams of Garden City went up 22,000 feet in his plane and saw the sun raise its head out of the sea east of Montana. He saw it a second time just before he brought his plane down on Roosevelt Field at 7:20.

But, of course, no real aviator will be content until he has realized the life ambition of the captain of the air-mail packet in Kipling's story. When flying speeds are up to approximately 1,000 miles an hour our pilots can race neck and neck with the sun. "We'll Jossou him," said Kipling's navigator, shaking his fist at the pursuing orb of day.—New York Times.

Named For Honor

McKee Trophy Will Go To Pilot Mat Berry

Pilot Mat Berry, who located two aviators lost in the north country last year, has been nominated for the McKee trophy by Major D. R. MacLaren, superintendent, Pacific division, Canadian Airways.

The nomination was made to the Vancouver board of trade which had previously planned to nominate MacLaren.

The Edmonton board of trade has also nominated Berry for the McKee trophy.

A man told a spinster friend she ought to get married. "It's too late," she sighed. "All the good ones are taken." "If there were any good ones, I don't know who got them," snapped the man's wife.

Russian peasants crown the prospective bride with a garland of wormwood, to denote the trials and bitterness of marriage.

If You Have a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia is Safe for Children." "It gives like a charm."

Keep this in mind and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM!

Each tiny tablet is the equivalent of a fluid ounce of Phillips' Milk of Magnesia.

Made in Canada

MILK OF
MAGNESIA

The Midwinter Cold

Likely To Have Complications And Is Usually Most Severe

In the temperate zones, cold epidemics run in cycles, reaching three main peaks each year: In October, in January and in the late spring, around March or April. The midwinter one is usually most severe, and is followed by the worst outbreaks of pneumonia, influenza and other complications.

Men are somewhat more susceptible to colds than women, but one race is no more susceptible than another. Colds are caught somewhat easier by children under 5 and adults between the ages of 25 and 35 and by others. But the most striking variations have nothing to do with age, race or sex; they are the individual, possibly inherited susceptibilities.

In the United States, 17 per cent. of the population have one cold or less a year. Sixty per cent. have three colds a year. The other 27 per cent. come what may, regularly have from four to ten annually. These people are the living test tubes that will carry the virus alive between times for the rest of us.

No Bachelor Need Apply

Town Decides Married Men Must Represent Them

Conservative party authorities at Richmond, the pleasant and historic Surrey town which nowadays is a better-class London dormitory, let it be known they are resolved to have a married man as the town's parliamentary representative.

He must also have had some political experience, but must be fairly young. More than 70 men so far have been considered for the seat, where hitherto large Tory majorities have been the rule.

The seat is to be vacated by Sir William Ray, 61-year-old widower, who is retiring for reasons of ill-health.

Wealthiest Man in World

Riches Of Nizam Of Hyderabad Cannot Be Compared

Edwin C. Hill in Scribner's states that the Nizam of Hyderabad is by far the wealthiest man on earth. By universal reckoning the Nizam is worth at least one billion dollars. He has 800 tons of gold stored up in the strong room of his place—more gold than the Bank of England holds today. The stoop-shouldered, coffee-colored master of 13,000,000 lives so many diamonds, rubies, emeralds and pearls that he could use shovels to take them from the bins where they are stored.

SELECTED RECIPES

SWEET SWEDISH BREAD

Temperature: 400 degrees F.-350 degrees F.

Time: About 45 minutes.

Cake: fresh yeast; 1/2 cup lukewarm water; 1 cup flour; 1 tablespoon sugar; 2 teaspoons salt; 4 cups Royal Household flour; 3 tablespoons oil; 1/4 cup sugar; 1 egg; 1 teaspoon lemon juice.

Method: Dissolve yeast in lukewarm water. Scald milk; add 1 tablespoon sugar and the salt. Cool to lukewarm. Combine with yeast mixture and 1/2 cup flour. Add oil and lemon juice. Cover and let rise until light (about 50 minutes).

Cream the butter; add sugar gradually, beating well after each addition. Add honey and flavoring. Ice bread when cool.

Recipe by Mrs. E. M. MacKenzie.

COOKIES

HONEY ICING

1/2 cup butter; 1/2 cup icing sugar; 1 1/2 teaspoon honey; 1 teaspoon vanilla.

Method: Cream the butter; add sugar gradually, beating well after each addition. Add honey and flavoring. Ice bread when cool.

Recipe by Mrs. E. M. MacKenzie.

GRAHAM CRACKER CREAM PIE

16克里斯的 Graham Wafers, rolled fine

1 teaspoon flour

1/2 cup shortening — part butter—part oil

1/2 cupful granulated sugar

1/2 teaspoon cinnamon

1/2 cupful cream

1/2 cupful custard

1/2 cupful cream

1/2 cupful corn starch

Cook together until this mixture coats the spoon. Pour into pie plate.

CUSTARD FILLING

3 eggs yolks

1/2 cupful sugar

2 tablespoons corn starch

Cook until this mixture coats the spoon. Pour into pie plate.

MERINGUE

Make a base of 3 egg whites and 2 1/2 tablespoons granulated sugar.

Spread on top of custard. Sprinkle remaining cracker crumb mixture over top of meringue. Bake in a moderate oven (325 degrees F.) until meringue is brown.

Royal Bank of Canada

68th Annual Meeting

Morris W. Wilson, President and Managing Director, Stresses Need for Orderly Recovery—Recommend Commission to Investigate Financial Relationships of Dominion, Provincial and Municipal Governments.

Sydney G. Dobson, General Manager, Reports \$56,000,000 Increase in Deposits—Profits Improved—Business Doubtlessly on Up Grade"

Warning against the dangers of a speculative boom, and a plea that recovery be maintained on orderly basis were outstanding features of the address of Mr. W. Wilson, President and Managing Director, at the 68th Annual General Meeting of The Royal Bank of Canada.

That recovery was well under way could be little doubt, and "even the most sanguine would have hesitated a year ago to predict progress as great as that which has been accomplished during 1936," said Mr. Wilson.

In addressing the meeting, Mr. Wilson said, in part:

"A serious drought again affected large areas in the West, with results that were disastrous to farmers immediately concerned. Those farmers who reaped good crops last year were materially better off by higher prices, but in the midst of a broad recovery, farm income has lagged behind.

"It is gratifying that the stocks of grain in Canada are again of normal proportions. Nature is in a fair way to take the Government of Canada out of the grain business. It is sincerely hoped that she will not be drawn into it again.

Industries

"Prices for newsprint have shown a slight increase during the past year and this, together with a heavier volume of sales, has brought encouragement to the newspaper industry.

"In the lumber industry there has been a satisfactory volume of demand from Great Britain ever since the beginning of their building boom. This demand has been maintained during the past year and is the most important factor in the improvement of conditions in lumbering."

"The value of Canadian mineral production established a new high record in 1936, amounting to approximately \$350 million compared with \$312 million in 1935. The prospects of the Canadian mining industry are more favorable than at any time in the past.

"Throughout the manufacturing industries of Canada, volume of production has been above the level which prevailed in 1932 and in October reached the highest point recorded since July 1929.

Employment and Relief

"At the moment manufacturing employment is close to normal. In mining, as a whole, the number employed is greater than at any time in our history. In trade the volume of employment is not unsatisfactory. Under these circumstances, I cannot but feel that the time has come to examine unemployment lists of those receiving unemployment relief.

"The remarkable fact that there has been no census of unemployment since 1931 does not mean that the requirements of our ordinary borrowers were that much smaller. The reduction is fully accounted for by the making available of special loans, namely, about \$33,000 due to the Wheat Board liquidated principally through the sale of surplus stocks, and the repayment of approximately \$10,000,000 due to the Canadian Pacific Railway, that company having been the largest single customer of the chartered banks of Canada under Dominion Government contract and the repayment of approximately \$10,000,000 due to the Canadian National Railway.

"Let us review a few of the whole subject by the object of resolving these complexities. Changed social and economic conditions have thrown many new factors into the balance sheet which were never contemplated at the time of Confederation, and as a consequence it is found increasingly difficult in some instances to meet the additional liabilities with the sources of revenue at their disposal. Having regard to the necessity of maintaining the national credit at all hazards, it is felt that some must be found which will permit both provinces and municipalities to continue the service of our public debt in full.

Individualistic in Full

"It is in the fashion in certain countries to say that the system of capitalism—or, as I prefer to term it, individualism—has failed.

"In the past it has adapted itself to changes in economic conditions and social concepts, and there is no

Have Found New Pet

Workers on the international railway bridge at Fort Erie, Ontario, have found a new pet—a one-legged gull. The bird, which can hop along as well as it normally equipped brothers and sisters, now visits the bridge employees every day for his meals since the man started feeding it.

Improvement in Business

"A review of conditions in Canada and other countries in which the bank has branches, indicates a definite improvement in business in Canada and in practically all of the foreign countries in which we are operating."

"Business is undoubtedly on the upgrade, and I look forward to 1937 with a greater feeling of confidence than has been justified for some years.

A Woman's Job

A woman who recently addressed the Royal Institute of British Architects is said to have been the first of her sex to do so in one hundred years. The next innovation should be the securing of feminine help in planning kitchens and providing for enough cupboard room in all house designs.

SAYS EASY MONEY POLICY IS THE BEST FOR CANADA

Ottawa.—Although the Dominion government is convinced "an easy money policy" is best for Canada, it is opposed to inflation as certain to bring ruin and misery.

Hon. Charles Dunning, minister of finance, made this clear in the House of Commons as two resolutions from the Social Credit group were defeated without recorded votes. One proposed a government issue of purchasing power and the other a nationwide scheme for financing consumption.

"From the domestic point of view parliament has entrusted to the Bank of Canada the function of regulating currency and credit in the public interest," said Mr. Dunning. "Omnious information regarding the day-to-day discharge of this function cannot be given but we trust show clearly the broad line of policy which has been followed by the bank."

"I think it can be said with safety that to-day lower interest rates for credit-worthy borrowers, individual, corporate, municipal, provincial and Dominion, prevail in Canada than ever before in Canada's history."

"And I submit that an easy money policy is the best policy for Canada at the present time, however unpopular it may be to those who have money to lend."

"But our testing-time will come whenever, by means of a too high price level, including wild speculation in commodities, stocks, etc., it becomes desirable in the public interest for the Bank of Canada to exercise the credit control powers conferred upon it by parliament to check this tendency. That I say will be the testing-time."

The first Social Credit resolution proposed by John Blackmore, leader of the group, provoked a two-day debate and picked up the support of the whole Co-operative Commonwealth Federation group and two Liberals, W. A. Tucker of Rostherne and T. J. O'Neill of Kamloops.

It was: "That the Canadian government should consider the advisability of beginning this year to issue purchasing power and to use that purchasing power for the improvement of the economic condition of the Canadian people."

The other one, sponsored by Victor Quach (S.C., Acadia), drew no speakers apart from the mover. It declared: "That it has arrived in Canada for the adoption of a definite, scientific, nation-wide scheme for financing consumption."

Conservative Leader Bennett joined with Mr. Dunning and Hon. N. McR. Rogers, minister of labor, in opposing the first resolution but said it was not surprising some Liberal members supported it. Before the last election leaders in the Liberal party such as Hon. Ian Mackenzie, minister of national defence, were urging the very doctrine set forth by Mr. Blackmore in his resolution, he declared.

Support For Civil Aviation

Appropriation Increased For Airports, Airways And Other Activities

Ottawa.—New support for civil aviation is being provided by the government. The 1937-38 estimate for maintaining and operating airways, airports and associated activities is \$1,222,917.

This appropriation, made public when the estimates were tabled, is \$481,610 higher than for the current fiscal year.

While the estimate for maintenance and operation is up, that for construction is down from \$807,650 to \$761,355. The program of building has advanced to a point where less money is needed for that purpose, transport department officials explained.

Meanwhile the government is getting inquiries respecting proposed contributions to municipalities which intend improving their airports or have already done so. Under a recent order-in-council the government is empowered to contribute one-third of the cost to such municipalities provided they are on the trans-Canada airway to be inaugurated next summer.

Quebec Minister Visiting West

Montreal.—Discussions of rural problems between Hon. B. Dussault, Quebec minister of agriculture, and the ministers in western provinces, are planned during a tour which Mr. Dussault is making. The minister said he would spend three weeks in British Columbia, Alberta, Saskatchewan and Manitoba.

A Temporary Measure

Japan's Control Of Foreign Exchange Considered Emergency Move

Ottawa.—Assumption of control of foreign exchange by the Japanese government is a temporary measure and will not permanently impair trade with Canada, trade experts believe.

Canadian exports to Japan have apparently been held up with those of other countries since the Tokio government cut off the supply of foreign exchange, although no definite reports have yet been received by the trade and commerce department or the department of external affairs here.

The view here is the new system of exchange control put into effect recently is an emergency move.

As it is regarded as a matter of internal Japanese economy, officials said no representations would easily be made by the Canadian government if all countries are treated the same way.

There appeared to be nothing in the trade arrangements effected a month ago between Canada and Japan that had a bearing on the matter, officials said.

Cabinet Changes

Two Portfolios Change Hands In Alberta Government

Edmonton.—Alberta's government underwent reorganization when two portfolios changed hands. Hon. C. L. Maynard was sworn in as minister of municipal affairs in charge of relief and Dr. W. W. Cross as minister of trade and industry.

The 28-year-old Mr. Maynard, second youngest cabinet member in the British empire, was appointed a ministerial portfolio last May to supervise Social Credit plans. He takes the ministry of municipal affairs from Provincial Treasurer Charles Cockroft who had held that portfolio since the government was formed.

Dr. Cross, acting minister of trade and industry since mid-November when Provincial Secretary E. C. Manning took indefinite leave of absence because of ill health, will remain in charge of the department of health.

The ministers were sworn in by Chief Justice Harvey, administrator of the province. Premier William Aberhart and R. A. Anderson, clerk of the executive council, witnessed the ceremony.

Would Appoint Commission

Urges Probe Into Financial Difficulties Of Western Provinces

Ottawa.—Appointment of a royal commission to probe the financial difficulties of Manitoba, Saskatchewan and Alberta was urged on the senate by Hon. John T. Haig (Winnipeg), in the debate on the address in reply to the throne speech.

This step was necessary to save the credit of the prairie provinces and resultant injury to Canada's financial standing. New homes constructed to relieve unemployment should be free from municipal taxation, Senator Haig submitted.

Loan companies and financial institutions were being driven out of the west by the radical legislation enacted by these provincial legislatures, Senator L. S. McMeans another Conservative member from Winnipeg asserted. "Many of the difficulties of the western provinces are due to the provinces themselves," he stated.

Group Will Be Smaller

Fewer Men In Military Contingent Going To Coronation

Ottawa.—A Canadian contingent representing all the different arms in the military service will go to the coronation in May but in smaller numbers than in 1911, the department of national defence said.

The number has not been decided definitely, officials said, but it was thought not likely to exceed 300.

The Canadian government will pay the expenses this year and the appropriation is \$197,000.

Admitted To Bar

Hon. C. P. Fullerton Called To The Bar Of Ontario

Toronto.—Hon. C. P. Fullerton, former chairman of the board of railway commissioners and until recently chairman of the board of directors of the Canadian National Railways, was called to the bar of Ontario at the convocation of the benchers of the law society of Upper Canada.

Mr. Fullerton, a native of Amherst, N.S., is a former justice of the Manitoba court of appeals and a member of the bar of Manitoba and Nova Scotia. He is at present residing in Montreal.

NEED A REVISION OF COST OF LIVING INDEX METHODS

Ottawa.—Survey and revision of the "theoretical and impractical" methods used in compiling the living cost index published by the labor department and frequently referred to in wage disputes was urged upon the Dominion government by the Dominion joint legislative committee of the international railroad brotherhoods.

In the recent hearings before the conciliation board, whose report is expected soon, it was claimed representation of the railroads had been placed at a considerable disadvantage by being confronted with "unreliable statistics compiled from somewhat antiquated methods," which did not reflect actual conditions and so could not be a reliable basis for wage adjustments.

The Canadian cost of living indices are merely estimates and not founded on comprehensive budgetary studies, the committee claimed. Recent detailed studies of consumption habits of the workers are lacking; instead, estimates are made, based on fragmentary and often out-of-date budget investigations.

The annual submission of legislative proposals by the railroad men was made to Hon. Ernest Lapointe, minister of justice, Hon. C. D. Howe, minister of transport, Hon. H. Norman Revelle, minister of labor, the prime minister being occupied with a government caucus.

Many of their recommendations were admittedly reiterations of proposals put forward in former years. Amendment of the British North America Act so that Canada could change her own constitution; state health insurance; legislative protection of the workers' right to organize; opposition to the development of the St. Lawrence waterway for transportation purposes; regulation of motor vehicle transport by a transport commission similar to the railway commission.

Condensation was expressed for the government's efforts to solve unemployment. Many existing difficulties, they agreed, could be more easily adjusted if Canadian workers were "privileged, without fear of intimidation, to organize for their own common good and their right to do so was adequately protected" by legislation.

Proposed amendments to the railway act include a recommendation that \$500,000 per year, rather than the present \$200,000, be provided for the elimination of grade crossings, and a recommendation that two men be required on all motive powered machines.

Should Improve Quality

London.—The dominions and Australia should reduce their livestock production, producing less meat and improving the quality for better prices, as a solution to problems of the world meat trade, the Marquess of Titchfield (Conservative), declared in the House of Commons.

As it was necessary to save the credit of the prairie provinces and resultant injury to Canada's financial standing. New homes constructed to relieve unemployment should be free from municipal taxation, Senator Haig submitted.

Loan companies and financial institutions were being driven out of the west by the radical legislation enacted by these provincial legislatures, Senator L. S. McMeans another Conservative member from Winnipeg asserted. "Many of the difficulties of the western provinces are due to the provinces themselves," he stated.

Ancient Coronation Chair Ready For Ceremonies

Those Canadians who have visited Westminster Abbey will undoubtedly have seen the Coronation Chair, upon which all British monarchs are crowned, but it is doubtful whether they have ever seen it in the position shown above. No longer guarded by railings, the chair is shown as it will stand in the Coronation Theatre of the Abbey ready for use when their Majesties the King and Queen are crowned.

2187

WARNS OF WAR

Speaking in London recently, Field Marshal Lord Milne, intimated that he would not be surprised if a war raged in Europe within the next five months.

Europe In Icy Grip

Wrecks In Gale-Lashed Seas Cause Many Deaths

London.—Winter, tightening an icy grip over Europe, left many villages snowbound and was believed the cause of at least 51 deaths in gale-lashed seas.

Twenty-five persons drowned when a German ship sank in a Baltic blizzard. Twenty others were lost in the wreck of the Finnish steamship Savannas off Norway's southern coast. Two French fishing boats were reported founders with loss of six men.

Snow storms swept Scandinavia, most of Germany, eastern France and northern England. Huge waves pounded the coast of Britain and France along the English channel and the Atlantic.

The 2,288-ton Russian steamship Ilmen, disabled she was drifting near the Shetland Islands, her engine stopped. A salvage ship put out to help her.

The Norwegian mailboat Venus sank 19 miles from the Norwegian freighter Trym in the North Sea after spending the night on the train.

Passengers from a British mail ship who disembarked at Esbjerg, on the west coast of Denmark, to go by train to Copenhagen, on the east coast, had to return to Esbjerg after spending the night on the train among snowdrifts.

Farm Loans

3,979 Loans Made To Farmers Under Farm Loan Act

Ottawa.—For the nine months of the current fiscal year, from April 1 to Dec. 31, 1936, 3,979 loans were made to farmers under the farm loan act. Hon. J. G. Gardner, minister of agriculture, told the House of Commons. This involved a total of \$327,599, in actual disbursements.

Loans and disbursements in that period in the western provinces follow: Saskatchewan, 999 (\$2,203,619); Alberta, 377 (\$820,343), and British Columbia, 53 (\$104,573).

Health Bill Set Over

Toronto.—Ontario government will not introduce health insurance legislation this session, Acting Premier Harry Nixon said. Hon. David Croll, minister of welfare, has been studying insurance and has conferred with British Columbia officials, that province having a health insurance scheme in operation.

Enters U.S. Derby

Laconia, N.H.—Ennil St. Goddard of The Pas, Man., has wired his entry for the world's championship Laconia sled dog derby, February 7.

The famous young Manitoban is credited with having won more sled derbies and more prize money than any other musher in the history of the sport.

To Combat Influenza

Doctor Advises Best Thing Is To Build Up Resistance

Toronto.—Changes in weather react neither favorably nor adversely on influenza, says Dr. John T. Phair of the Ontario department of health.

"There is no foundation for the presumption that cold weather checks the spread of influenza and the germ is not lying around on ships and in cold weather," Dr. Phair said. "The disadvantage of wet feet is offset by exposure in extra cold weather."

"The important thing is devising some scheme of raising resistance to the disease," he said. "The germ is in the nose and throat of a carrier or patient, and is passed on to some exposed individual, usually by a cough."

Outbreaks of influenza were reported small in most districts. Most cases were of a mild nature. The death toll for the provinces stood at seven, five of which were in Toronto.

ROOSEVELT WOULD REMOVE CAUSES OF INJUSTICE

Washington.—President Franklin D. Roosevelt dedicated himself anew to the start of his second administration to removal of "cancers of injustice" that cause want in the midst of plenty.

As he did four years ago, Mr. Roosevelt repeated the oath in full. His head bobbing with the rhythm of the phrases, he weighed each word with obvious care and raised his voice perceptibly at the pledge to "support and defend the constitution." The word "defence" he accented heavily.

Then he turned to the dripping crowd before him and with no ado launched upon his address.

"We will carry on!" he cried exultantly. Prosperity, he said, is tempting the country to forget further progress.

"I see millions of families trying to live on incomes so meager that to them day by day family disaster hangs over them day by day."

"I see millions whose daily lives in city and on farm continue under conditions labelled indecent by a so-called polite society half a century ago."

"I see millions denied education, recreation and the opportunity to better their lot and the lot of their children."

"I see millions lacking the means to buy the products of farms and factory and by their poverty denying work and productiveness to many other millions."

"I see one third of a nation ill-housed, ill-clad, ill-nourished."

"I want in despair that I paint you that picture, paint it for you in hope—because the nation, seeing and understanding the injustice in it, proposes to paint it out."

In conclusion, the president vowed: "In taking again the oath of office as president of the United States, I assume the solemn obligation of leading the American people forward along the road over which they have chosen to advance."

"While this duty rests upon me I shall do my utmost to speak their purpose and to do their will, seeking divine guidance to help us each and every one to give light to them that sit in darkness and to guide our feet into the way of peace."

Progress in recovery is obvious, the president said, but the "new order of things" brought about since 1933 means more than that.

Mr. Roosevelt said the greatest change in recent eventful years was the change in the moral climate of America."

"With this change in our moral climate and our rediscovered ability to improve our economic order," he observed, "we have set our feet upon the road of enduring progress."

"In these last four years," Mr. Roosevelt said, "we have made the exercise of all power more democratic; for we have begun to bring private autocratic powers in their proper subordination to the public's government."

"The legend that they were invincible—above and beyond the processes of democracy—has been shattered. They have been challenged and beaten."

Mentioning the democratic process at another point, he made this assertion which occasioned some speculation as to whether he had the counts in mind:

"The essential democracy of our nation and the safety of our people depend not upon the absence of power but upon lodging it with those whom we can change, or continue at stated intervals, through an honest and free system of elections. The constitution of 1787 did not make our democracy impotent."

BANK OPERATIONS AND WHEAT SALES IN ARGENTINA

Winnipeg.—Scouting a cause for rapid movement of Argentine wheat below Canadian price levels, counsel at the Turgeon royal grain commission sought effects of international banking operations when linked with marketing of Argentina's crop.

Mr. M. M. Porter, K.C., Calgary, counsel for the Alberta wool pool, disclosed his information showed companies in both the banking and grain sectors had established a price through dual operations that made it advisable for Canada to determine the exact situation.

The commission also heard from Sidney T. Smith, president of Reliance Grain Company, Limited, that speculative interest in the Winnipeg Grain Exchange futures market was increasing. Questioned on reports of United States banking interests loaning money to terminal elevator companies at lower rates than Canadian banks, Mr. Smith said his company had considered such loans but decided against them.

Terminating discussion on the operations of dual banking and wheat exporting companies in Argentina, Mr. Justice W. F. A. Turgeon suggested Mr. Porter and Hon. J. L. Ralston, Montreal, commission counsel, confer on the question and determine what evidence could be produced.

Outlining the situation to Mr. Smith, Mr. Porter said the dual companies extended credits to merchants who in turn extended the credit to farmers. His point, said Mr. Porter, was that in this kind of marketing with marketing controlled the rapid movement of the crop on world markets.

Mr. Smith said he had heard such an operation was carried out in Argentina but that he had not had definite information.

What could Canada do to meet competition developing from the situation? asked Mr. Porter.

The only thing Canada could do so far as he knew, said Mr. Smith, was to get the best price it could for its wheat and meet the competition. What the dual companies make on currency exchange did not come into the calculations of Canadian exporters, he said. He doubted if anyone could learn details of the dual operations.

Speculation on the Winnipeg Grain Exchange had increased greatly in the past year, said Mr. Smith, examined by M. A. MacPherson, Regina, counsel for the Saskatchewan wheat pool.

Speculative interest was almost essential to the open market and futures method of trading, said Mr. Smith. There was more general buying of wheat futures by the general public than a year ago, he estimated.

Canadian Bluejackets

En Route To England To Bring Back Two Destroyers

Ottawa.—Two officers and 119 ratings from the naval base at Esquimalt are en route to Halifax, their eventual destination England. At the Nova Scotian port they will join a similar draft, and the combined party will sail on S.S. Montclare for Liverpool.

The Canadian bluejackets are assigned to the task of bringing to Canada the two recently-purchased destroyers, H.M.C.S. Fraser and H.M.C.S. St. Laurent.

Asks Work For Wages Policy

Ottawa.—Discontinuance of unemployment relief and substitution of a work for wages' policy is urged in a resolution in the name of Dr. T. F. Donnelly (Lib., Wood Mountain) on votes and proceedings. Direct relief, says Dr. Donnelly, is demoralizing the people who receive it, increasing poverty and extending the period of depression.

Health Bill Set Over

Toronto.—Ontario government will not introduce health insurance legislation this session, Acting Premier Harry Nixon said. Hon. David Croll, minister of welfare, has been studying insurance and has conferred with British Columbia officials, that province having a health insurance scheme in operation.

Enters U.S. Derby

TODAY'S THOUGHT

— —

Oh, the comfort, the inexpressible comfort of feeling safe with a person—having neither to weigh thought nor measure words, but pouring them all right out just as they are, chaff and grain together; as certain that a faithful hand will take and sift them, keep what is worth keeping and with the breath of comfort blow the rest away.

SCOTIA'S BARD

JANUARY 25th marked another anniversary of Scotia's famous Bard, Robert Burns. Throughout the length and breadth of the world, Scot's foregathered to commemorate his memory. It mattered not whether it was in City, Town, or Hamlet; whether it was a large function or a small one, each Scot paid fitting tribute, on that day, to a glorious memory. Born in the wee toon of Alloway, in Ayrshire, Scotland, in 1759, and died at Dumfries, July 23, 1796, at the age of 37.

The two most influential books in his early life were: "History of Sir William Wallace," which roused his patriotism for Scotland, and a book of English-verse, called "The Lark."

His first book of poems was published at Kilmarnock in 1786, with an enlarged edition at Edinburgh, the following year.

He is easily the foremost of Scottish Poets, and one of the best loved of all poets. He had genius, and the goodness and honesty of his heart were not sullied by the tragic poverty and many errors which beset his life.

For sheer music his lyrics have hardly been surpassed in any language.

Scottish to the marrow of his bones, and, though he wrote many poems in English, he was most successful when he poured out his feelings for his country and his own people in his own language.

"False friend nor hypocrite was he,
For Duke or Earl he cared not;
(His earnest with he penned fu weel)
That's me to make the waird ower
Wal' britches for a'that.
On Jasuar's' twenty-fifth,
Let like Scott be true and loyal,
Sing loud the praise of Robbie Burns,
He, wha lang syne was born in Kyle."

DON'T LOOK FOR IMPERFECTIONS

S IT not the case that many, many of us have developed the habit of searching for flaws, seeing only the imperfections, overlooking the seeing of beauty, in this world of humanity and the things about us. We might as well face the facts clearly, for, nevertheless, this action is about one of the most foolish and short-sighted habits that we can form. It is very unfair to the world of humanity at large, and besides the person, who does this thing continually, becomes a misanthrope. If one wishes to keep a sane mind, and a wholesome kind of soul, one does not want to acquire the habit of looking, too much, for spots.

None of us will anticipate it or wish it, of course, but just as sure as the sun is in the sky, the habit will react upon oneself in many direful ways, and will darken life and kill joy, warping one's character as few other habits, one might indulge in, could possibly do. To flatter yourself that you are clever enough to be able to pick out the flaws that others can't see, and thus encourage yourself in the exercise, is simply to play the fool in a lamentable way.

Let us then, look, not on the imaginary or the unreal, but look through all the outward rubbish and imperfections, loving the ideal of our fellowmen's nature and the other things around us.

OLD TIMERS RE-UNION

BEFORE another issue is in your hands, the Old Timers will have held another Re-union, friends of long ago will have met once again, and talked-over old times and the old pleasant associations. Gatherings of this kind are very nice, as it brings together those who probably would not meet one another for years, and gives each a chance to discuss and listen to the many problems of one another.

To you, Old Timers, we extend "Heartiest Greetings," may your 1937 Re-Union be as pleasant as those heretofore, and may success crown the efforts of your Committees to make February 3, 1937, an outstanding event in your memories.

The attendance of all Old Timers is necessary, so arrange to be there and give your support.

Orfiss Kolumn

P. D. Sez.

Home is a place where modern young sons and daughters sleep when everything is closed.

MILK

MANY authorities who have studied the food requirements of children and adults have stated that milk is without exception the most valuable food for maintaining health. For this reason, every child should receive at least a pint and a half of milk every day. One of the greatest public health advances in modern times is the providing of a safe, clean milk supply by pasteurization followed by bottling of the milk. The pasteurization process kills the dangerous disease producing bacteria such as typhoid and dysentery which may accidentally get into the milk. Raw, unpasteurized milk is unsafe and should never be fed to children unless it is first boiled. The health promoting properties of milk are largely due to the large amounts of both calcium protein which it contains and also to the presence of three essential vitamins. If a child's diet is without milk, it is much too low in calcium for healthy strong bones and teeth. The protein is necessary for normal growth and development of the child. Many adults would also have improved health if they consumed more milk. One thing is lacking in milk, however, and that is the mineral iron. Because of a lack of this mineral, a baby should not be fed milk alone any longer than 4 to 6 months, or he will become anaemic. At this age, solid foods gradually should be added to the diet and these will supply iron as well as the other necessary constituents for health and growth. A well-balanced diet should always contain liberal amounts of pasteurized milk which is our most valuable food.

Two most influential books in his early life were: "History of Sir William Wallace," which roused his patriotism for Scotland, and a book of English-verse, called "The Lark."

His first book of poems was published at Kilmarnock in 1786, with an enlarged edition at Edinburgh, the following year.

He is easily the foremost of Scottish Poets, and one of the best loved of all poets. He had genius, and the goodness and honesty of his heart were not sullied by the tragic poverty and many errors which beset his life.

Good Faith—and a Good Name!

Money—the financial resources of small investors—was loaned Alberta in good faith, and at a time when the province needed help. Shall we break faith with these, our fellow-citizens? Shall we not rather preserve our good name of being "square shooters"? Shall we not rather build up than break down the integrity and honesty which are, without doubt, the best policy?

Alberta is a great province, with wonderful natural resources. The development of these resources offers a bright future. This outlook has been hampered by ill-conceived legislation aimed to "soak the rich" but which in reality hurts the little fellows.

A prominent Canadian, who, by the way, is a successful Western farmer, declared that the drastic steps recently taken by the Alberta Government had, quite naturally, destroyed public and, to a certain extent, private credit; but he felt that the native common sense and judgment of the vast majority of Albertans would assert itself because they know that financial integrity and financial honesty are always the best policy.

This statement is one of a series written by The Mortgage Loan Association of the Province of Alberta. The Association is composed of 31 local companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The sixth statement in this series will be published in two weeks)

SCRAPS

By Y. G.

Friendship

"Make me worthy of friendship, and give me friends; make me worthy of love; and give me love," was the daily prayer of a loyal heart that had learned the sacredness of human ties. Many a lonely one, complaining of neglect and isolation, would find life's whole environment changed by learning humbly and sincerely to pray that prayer. Friendship, to abide, must find a worthy resting place, and love has its duties as well as its blessedness. No one can demand either as a right, they are God's good gifts, and the heart that is tender and unselfishly ready for them will never miss them.

Life

In the stir and hurry of life, how careless we are of little courtesies! We rudely brush aside love that yearns to bless us. Unthinkingly, we wound hearts whose joy or sorrow hangs upon our slightest act or word. Pride of carelessness checks the spontaneous expressions of our love. We crush and cast aside the flower of life's mystery, and then bemoan the monotony of existence. O, to be awake every morning to the wonder and majesty of it all.

MEALTIME TROUBLES WITH CHILDREN

By Betty Barclay

Have you ever dined at a restaurant or in the home of a friend and almost forgotten your own hunger as you observed a little tot eating everything placed before him? Such things happen rarely—and you may have been favoured by seeing it.

But far more likely you have seen these children pick and pout, wriggle and whine, and refuse the foods served—just as your children refuse spinach, tomatoes, celery, potatoes and even milk.

Your mealtime trouble with children is not yours alone. It is a curse borne by countless mothers in every land. Mothers know the agony of watching a day in the life of their children, and know that certain foods are good for the children. They try to make use of their knowledge—but Grace or George refuse to eat the foods they should eat and persist in��ing upon the foods that are not particularly good for them.

There are dozens of reasons, but here are two that should be noted by every mother. First, food that is always prepared in the same way becomes tiresome to tiny tots. Second, the few good foods liked by your children are served so often that they tire of them.

Children who love a glass of milk may suddenly develop a dislike for it, if four glasses a day are served every afternoon and after work. Children who like a particular milk drink may tire of it unless the flavour is changed or it is served in a new way. When this happens you are worse off than ever. Two or three good foods, that were your standards, are now in the discard.

Try to remember these things when preparing dishes for children. Some of the daily milk requirement may be given by cooking escalloped potatoes or beef with it, or by making it into egg nog, remelt-custard desserts, ordinary custards and puddings.

— J.E. —

Golden Mountain

1 package Orange Rennet Dessert Powder

1/4 cup prune pulp (der.)

2 teaspoons lemon juice

1 pint milk

1 egg white

3/4 cup sugar

Prepare remelt-custard dessert according to directions on package. Chill in refrigerator. Beat egg white until stiff, add sugar gradually until thoroughly blended. Add prune pulp (prepared by rubbing cooked prunes through a sieve and lemon juice. Just before serving heap the glasses of remelt-custard dessert with prune whip, and if desired garnish with sections of diced orange.

— J.E. —

Eggless Coconut Rennet-Custard

1 Rennet Tablet

1 tablespoon cold water

1 teaspoon vanilla flavouring

1 pint milk

3 tablespoons sugar

3/4 cup coconut

Prepare remelt-custard according to directions on circular in package. Chill in refrigerator. Just before serving, top each dish of ice cold dessert with two tablespoons of coconut.

Faster Cruising Speed Of Commercial Planes Provides A Problem For Airports

Increase of nearly 100 miles an hour in cruising speed of commercial planes in the past five years has provided a problem for airports on the trans-Canada airways that the government is meeting with direct financial assistance.

Hon. C. D. Howe, minister of transport, explained the purpose behind a recently-signed order-in-council empowering the government to assist municipalities on the trans-Canada airway which will be inaugurated next summer.

"Some years ago," he said, "a number of cities on this route provided airports at their own expense, but progress in aviation has brought larger and faster aircraft into use and facilities which were satisfactory at that time no longer meet the needs of modern air travel."

"It is felt that the efficient operation of the trans-Canada airway is contingent on the provision of proper airports in the principal cities to be served and the financial position of those cities to-day renders it difficult for them to undertake the improvement of existing airports or the provision of new airports suitable to modern requirements.

"The government has, therefore, undertaken to extend a measure of financial assistance to the municipalities concerned to the extent of not more than one-third of the amount already expended by such municipalities on improved airports; also not more than one-third of the amount which may be incurred on the trans-Canada airway may agree to expand or improvements to existing or new airports on the airways."

Hangars and buildings do not come within the order-in-council.

In making the airport improvements, departmental officials said, speeds of at least 200 miles an hour will have to be considered. Five years ago the average cruising speed of commercial aeroplanes was about 100 miles an hour; now it is 180 miles or more.

King George Approves Plans

Full Schedule Of Coronation Events Has Been Announced

Britain will celebrate the coronation of the king on May 12 with an 11-week program of dinners, levees, balls and reviews expected to surpass the pomp and circumstance originally scheduled for Edward VIII.

The full schedule of events, beginning with a court reception May 5 and ending with a garden party at Buckingham palace May 22, was approved by the king and announced by the Duke of Norfolk.

King George will broadcast a message to the empire the evening of May 12, review the fleet May 20 and make state visits to Scotland and Wales in July.

The ceremony of trooping the colors in honor of the king's birthday anniversary will be celebrated June 9.

The final route of the coronation procession will follow from Buckingham palace to Westminster Abbey and return was announced without change, to the relief of thousands who already had purchased tickets.

The royal servants at the state banquet and other functions will be banqueted in full state, with knighthoods, silk stockings and coats of scarlet, dark blue and gold.

The dinner to be given by the Duke of Gloucester on the eve of the coronation will be an indication of his position as the male member of the royal family next in the succession to the throne—the position normally occupied by the Prince of Wales.

The king's broadcast May 12 probably will be made from the study in the palace from which King George V. made his broadcast to the empire on his silver jubilee in 1935.

The state service of gold plate and the "Garter" china will be used at the state banquet.

The Island Of St. Michael

The Island of St. Michael, termed "Lake of Seven Cities," comprises 297 square miles and is 830 miles west of Portugal. Once famous as the first stopping place for Spanish galleons on their return from the West Indies, the busy port of Funchal, of nearly 250,000 population, presents a mixture of descendants from Phoenician and Carthaginian traders to an aristocracy descendant from Portuguese navigators.

Belgian linen factories are working full time to supply tents and uniforms for European armies.

She: "Why do you always eat with your mouth?"

He: "Because my fork leaks."

Language Corrupted

Says Canadians Are Slipping In Use Of Good English
C. E. R. Lowe, international examiner of the Trinity College of Music, London, England, says Canadians are slipping so far in the English language is concerned. He maintains they speak "American," not English.

He describes the lapses as "lip and tongue laziness" but adds: "I'm not complaining, but personally I do think it a pity: English is such a beautiful language—this English of Shakespeare, Milton and a hundred others."

"When in Toronto in 1928 it was the exception to find wrong pronunciation of the vowel 'u' and of the short 'a' where we use the broad 'a'; but now the Canadian speech is going over on the American side rather than the English side, and this makes a difficulty where candidates in our examinations are reciting great English verse or prose."

"Undoubtedly to-day the language is being corrupted in a great many ways, and while I don't like to speak with disrespect about any country, the Americans among themselves have corrupted the English language," he said. "In fact, it is not the English language that is being spoken in America to-day. It is the American."

Has Its Drawbacks

Women Would Get Little Pleasure Out Of Regional Cooking

Women in working-class homes spend too much time preparing and cleaning away meals, writes a doctor in the British Medical Journal. To this, however, he suggested regional cooking arrangements.

A sound enough scheme and one which should appeal to the over-worked housewives. But if it led to the general establishment in this country of the "kitchen factories" of Soviet Russia, there would be excuse for expressing regret.

In those Russian institutions the housewife can buy her joint and other dishes ready-prepared. All she has to do is to pop them in the oven and keep an eye on the clock. Delightfully simple but—

"This is nice—do tell me the recipe." Those are words that give great pleasure to women. How many would have to admit that one had no part in the making of what was lost we would all be if we couldn't say of some particular meal that it was as good as any that mother ever prepared with her own hands—London Sunday Pictorial.

The Latest Invention

Tub-Table-Stove Combination Idea Of Ohio Man

Alfred Castanien, 82, felt the country needed a "good bath tub" so he set to work in the attic of his home in Columbus and finally came forth with a tub-table-stove combination which becomes one or the other as the housewife desires.

"There are somewhere between \$8,000,000 and 15,000,000 homes in this country without regular tubs," Castanien declares. "Now, after eight years' experimentation, I have what every housewife needs—a good tub."

This latest has a top at one end for gas or oil heating of water for the tub, which is revealed when one presses a gadget or two."

The whole affair is raised from the floor so, as Castanien points out, "you don't have to move it to sweep under it."

The Patient Sailor

During the first evening of a visit to her daughter at the seaside an old woman who had never seen the sea before was found intently watching the lighthouse.

"What infinite patience sailors have," she said.

"Why?" asked her daughter.

"Well," she replied, "the wind has blown that light out 38 times since I've been watching, and each time they relighted it."

Found Plenty

When a woman at Fraserton station, near Dundas, Ontario, ran out of needles, she decided to open an old pin-cushion to see what she could find. The cushion yielded 223 needles, enough now to last her for life.

The best vitamins on the market to-day are plenty of sunshine, fresh food and pure air. With these most of folks will be able to get along.

2127

DUKE OF KENT IN HOLLAND

His Royal Highness the Duke of Kent posed for photographers as he arrived in Holland to attend the wedding of Princess Juliana, heir to the Throne of the Netherlands.

Old Proverb True

Cleveland Merchant Proved Saving Pennies Brought Him Dollars

In Cleveland lives a merchant who has paid off a mortgage on his little store by saving pennies. The merchant takes care of the pennies and the dollars will take care of themselves. "It may not be sensational, but the actual instance of some one applying the principle in practice was considered worthy of publication in a good many papers. Why? Because the man kept up payments consistently during the entire depression period when a host of people were excusing themselves for not paying debts because times were hard. He saved and applied to his obligations the little sums that others were letting slip through their fingers as of too small value to be accounted for. And what did he get for his pennies? The payment of his debt and the maintenance of his honesty and the maintenance of his self-respect."

That's a big pennyworth!—Detroit News.

Make Good Packers

Henrik Willem van Loon claims that the world's population could be packed into a box measuring half a mile each way. The Toronto Star asks if anything like that is going to be tried, why not get a street railway manager to conduct the experiment? The size of the box could then be substantially reduced.

Has Balanced Budget

West Vancouver, unique among British Columbia municipalities, has balanced its budget and has a surplus of cash and provincial government credits amounting to \$8,280. Revy J. B. Leyland told residents of this wide-flung district on the north shore of Burrard Inlet that a stewardship meeting there.

Has Balanced Budget

Started with a bonfire of 10,000 ounces of assorted narcotics which were seized after the "Be-Cured" News's "s-or-die" drive started this month.

The executions were the second in China's anti-narcotics crusade and were performed with gruesome fanfare.

The thousands of witnesses watched intently but with no sign of emotion.

The almost ceremonial killings started with a bonfire of 10,000 ounces of assorted narcotics which were seized after the "Be-Cured" News's "s-or-die" drive started this month.

After the contraband had been burned, the shackled prisoners were dragged to the scene and forced to pose for photographs for use by the authorities in their crusade.

American Funds Will Be Available To Preserve Duck Areas In Canadian West

Tribute To A Horse

Dynamic Little Black Horse That Could Not Be Conquered

A new headstone marks a lonely grave on Colorado's plains.

It is a cowboy's tribute to Midnight, the "buckin'est" bronc of them all.

In life, he was the arch-enemy of the top hands who ride the nation's rodeo circuit. Only once in 14 years did a cowboy die in a saddle ever manage to stay on him and then "Midnight" was old and tired.

Last November, when "Midnight" died after three years in retirement, he was buried in a grave on the ranch of McCarthy and Elliott, who had shown him during his career.

The cowhands at the ranch talked during the long evenings, about the dynamic little black horse they couldn't conquer. They recalled he wasn't vicious—that he never tramped a rider he'd tossed.

Finally, they decided to erect the marker—with a poem on it. Every hand on the place collaborated in writing that epitaph, and it rhymes—after a fashion.

Now the passerby who chances past the grave reads:

"Under this sod lies a great bucking horse
There never lived a cowboy he couldn't toss.
His name was Midnight; his coat
was black as coal,
If there's a horse-a-horse, please,
God, rest his soul."

Good Word For Cows

Agricultural College Employee Thinks They Are Smarter Than Horses

Take it from Miss Pearl Gardner of Cornell University's Agricultural School: the cows are not so dumb as her chow-chowing proponents have indicated.

Five years of tests made by 72 horses, 48 cows and 11 sheep have convinced Miss Gardner that the cow is smarter than the horse and the sheep Dobbins' menial "Cows," she told the American association for the advancement of science, "catch on quicker, remember better." The horse has gained his reputation for intelligence because of the fact that he trusts man far more than any other barnyard animal. Miss Gardner found no difficulty in teaching sheep to do tricks, such as taking a handkerchief out of her pocket, rolling a barrel and shaking hands, "just as readily as a dog."

So now we may be expected to exhort the ideal of solid thinking!—Detroit Saturday Night.

China Continues Crusade

Thousands Watch White Peddlers Of Narcotics Were Executed

An estimated 50,000 onlookers watched five narcotics peddlers executed on the broad steps of the world-famous Temple of Heaven in Peiping, China.

The executions were the second in China's anti-narcotics crusade and were performed with gruesome fanfare.

The thousands of witnesses watched intently but with no sign of emotion.

The almost ceremonial killings started with a bonfire of 10,000 ounces of assorted narcotics which were seized after the "Be-Cured" News's "s-or-die" drive started this month.

After the contraband had been burned, the shackled prisoners were dragged to the scene and forced to pose for photographs for use by the authorities in their crusade.

No Number Thirteen

Because Railway Sleepers Have Room For Only Twelve Berths

Conversations like to look up superstitions and are prone to tell listeners that most all of us are subject to beliefs of silly sentiment. They say the figure "13" is seldom used by those catering to the general public in hotels or ships or trains. It is hardly truth. Of course, it is particularly a fact that you never meet a "No 13" berth on a railway sleeper. However, there is good reason why a sleeping car has no berth 13. Those now used have room for only 12 compartments, upper and lower. And they do not have fourteen or fifteen either.—Brandon Sun.

Correct glasses do not weaken the eyes in any way; they may prove harmful, however, if worn after examination proves them unnecessary.

The earth revolves about the sun in 365 days, 5 hours, 48 minutes, and 45 seconds.

In the United States, 30 years ago, there were only eight varieties of soy beans grown, but now over 60 varieties are listed in seed catalogues.

Interesting figures were revealed at a conference attended by representatives of the Dominion Government, provincial governments and others concerned, called to consider matters relating to conservation of game and animals. It was reported that the annual turnover in Canada's business directly dependent on migratory birds alone amounted to \$3,500,000, and insectivorous birds are estimated to have an annual value to Canadian production of \$100,000,000.

Rapid depletion of game supplies in the southern parts of the Prairie Provinces and elsewhere were regarded with concern, but a report was received from the Central Experimental Farm at Ottawa that successful breeding of wild ducks in captivity had been demonstrated. It was intimated that this industry might grow to large proportions but legislation would be necessary to permit sale of wild ducks when raised under domestic conditions.

The Indian apparently compares favourably with the white man as a conserver of game. The delegates paid tribute to the Indians in this connection and complained of the destructive habits of white men.

A despatch from Washington says that United States waterfowl hunters are organizing to improve the "duck factories" of Canada.

The Moose Game Birds foundation announced the formation of "Ducks Unlimited," a national organization of American hunters incorporated as a non-profit foundation. Its objective will be to preserve and restore Canadian duck breeding grounds.

"The main aim of the raising of several hundred thousand dollars annually during the next five years," the announcement said. "All capital will be raised in the United States.

Although more than \$20,000,000 of United States government money has been spent on water and waterfowl restoration projects in recent years, the foundation estimates only five percent of the prairie-breeding ducks now nest in the States. Thirteen percent nest in the southern half of the Canadian provinces, Alberta, Saskatchewan and Manitoba, and 82 percent have been driven further north.

Premiers of the Canadian provinces and conservation groups have offered to set aside and place under supervision possibly a million acres of Canadian refuges.

Of Interest To Canadians

This Year's Canadian Almanac Is Best Yet Published

The Canadian Almanac is one publication that seems to become more complete each year. The 1937 issue, just off the press, has 680 pages crammed full of facts and figures concerning Canada and of interest to Canadians. Practically every branch of government service is covered, while educational, church and other organizations are given space and legal, commercial, financial and astronomical data, compiled in readily available form. It is a publication that business men and educators cannot afford to do without.

It is interesting to note that this is the sixtieth year of publication. Of all the 10 volumes, the 1937 one is the best. Its up-to-date ness is shown by its article on the Royal Family, compiled since the abdication of Edward VIII.

Another Reading
"I visited a phlebotomist to-day and had my bump read," Bottie told his wife. "He complimented me on the possession of a head with razorlike qualities."

"Did he explain what he meant?" his wife asked quietly.

"Well, no," replied Bottie, "but I gathered he'd noticed the keen edge of my ready wit and my clean-cut method of reasoning."

"I'm sure he murmured. "He knew as I do, he'd probably consider your head hollow ground."

Have Best Of Argument
Mrs. Barbara Hanley, Canada's only woman mayor at Webwood, declared that bachelorettes maintained a high standard of living and of education among the value of women in public life. But says the Stratford Beacon-Herald, the mayresses cannot prevent them from expressing their convictions as to the value of women in their private lives by remaining bachelorettes.

In the United States, 30 years ago, there were only eight varieties of soy beans grown, but now over 60 varieties are listed in seed catalogues.

The King, as visitor of the University of Wales, has approved the election of the Duke of Kent to be chancellor of the University of Wales.

New Canadian coins, bearing the effigy of King George VI, will appear this year, probably about the time of the coronation in May.

Extension of the criminal investigation branch of the Royal Canadian Mounted Police to have a laboratory at Ottawa is provided in the main estimates before the House of Commons.

Five directors recently appointed in the Department of Mines and Resources under the reorganization will each receive a salary of \$7,500, estimates before the House of Commons disclosed.

Net revenue from radio receiving license fees for the last fiscal year totalled \$1,574,431, according to the annual report of the marine department. This was an increase of \$87,023.

Prince Chichibu, brother of the Emperor of Japan, and Princess Chichibu will visit Canada on their way to the coronation of King George VI, it was announced by the Japanese legation.

Work on a \$400,000 tuberculous sanatorium, Jamaica's memorial to King George V, has commenced. Funds for the proposed four-storey structure were collected by subscription during the jubilee year.

Competent Canadian engineers are in demand in British West Indies. J. B. Christian of Toronto told Toronto newspapermen. Christian said there were a large number of positions open, particularly in oil development.

Aid H.B. Navigation

Discover Fine, Deepwater Channel At Entrance of Hudson Strait

What the marine department describes as a "fine, deepwater channel" at the western entrance of Hudson Strait has been charted by the hydrographic branch and possesses many advantages. The new channel runs between Digges Island and Cape Wolstenholme, which is the sharp point where Hudson Strait ends and Hudson Bay begins.

The distance is 22 miles, and the depth of the channel is 600 feet. The report says it is ice-free in the late fall for 10 days after the usual ship route north of Digges Island is filled with ice.

The newly charted channel passes a "rugged grandeur," the report says, continuing:

"At the eastern entrance of the sound on the mainland side, stands Cape Wolstenholme, a great rock promontory, whose perpendicular walls rise 1,000 feet from the water's edge. From this great headland, the sound is walled for several miles by stupendous cliffs. Hudson Strait possesses a wealth of magnificent cliffs; but nowhere do they rival rugged grandeur the cliffs of Wolstenholme. Greatly weathered by the action of the elements, these sheer rock walls have assumed the shape and sombre grey of old cathedral ruins."

Hard On Astronomers

Eclipse Of Sun Will Last Longest In Middle Of Pacific Ocean

The longest total eclipse of the sun since 1864, lasting seven minutes and four seconds, is in the chief event on the astronomer's calendar for the new year. This will happen on June 8. Unfortunately, there is no land at the place where it lasts longest, in the middle of the Pacific Ocean. Useful observations can be made from shipboard, but the slight unsteadiness of a ship, even on a calm sea, will provide many difficulties for which this long eclipse would be ideally adapted.

The shadow will first touch earth in the Pacific Ocean in the vicinity of the New Hebrides, where the sun will rise eclipsed. Then it crosses the ocean and leaves the earth in Peru, where the sun sets while still hidden. At both the beginning and end of the track, the duration will be as much as at the centre, and the sun will be very low in the sky, which will hamper observations.—Detroit Saturday Night.

Ten Years Of Canadian Aviation**Air Transport Has Proved Of Great Assistance To Mining**

Air transport is playing an increasingly important part in the transportation problems of Canada, and the use of aircraft in developing and conserving natural resources has increased each year. In 1925 there were only 39 licensed aircraft in the Dominion. By 1935 the figure had grown to 380 and today air-mail and air-transport lines are in operation in many parts of the country. In 1925 only a little over a half-a-million pounds of freight were carried by air. In 1935 the amount had grown to over 26,000,000 pounds, while mail-carrier had grown from 1,080 pounds in 1925 to 1,126,084 pounds in 1935.

Commercial air transport has proved of immense value to Canadian mining interests. After the preliminary surveys of new territory, then they bring in prospectors and equipment before, or directly after, the spring "break-up" so that operations can start without loss of time that would be inevitable in long journeys by canoe. After this air-planes bring drill and other gear for preliminary work, and carry men, supplies, and machinery in sections for subsequent development operations. Big cargo-planes are employed to carry out "concentrate" or bullion when a mine is in production, and aircraft are relied upon to service established mines, flying regularly to and from the nearest centre of supply.

Aerial survey work is another big factor for civil aircraft in Canada. Air surveys are made for suggested transmission lines, for new roads in virgin country, for harbour works, and for town planning schemes. A vital part is also played by aircraft in connection with the Canadian fisheries. Planes are used in the stocking of lakes and marketing of fish. For the last ten years the salmon fisheries off the coast of British Columbia have been patrolled by air from June to October. In Canadian forestry engineers rely on air patrols for fire detection and suppression. Survey flights are made to check timber-limits; and by air photography, in a single flight, an engineer can obtain a complete record of cutting operations.

Western Fairs**E. L. Richardson, Calgary, Elected President Of Association**

E. L. Richardson, manager of the Calgary exposition, was elected president of the Western Canada Association of Exhibitors at the closing session of the annual meeting in Winnipeg.

Fred W. Kemp, Edmonton, was elected vice-president and Sid. W. Johns, manager of the Saskatoon exhibition, was named secretary for his 10th term.

In order to make satisfactory midway arrangements, the Western Canada Fairs Association revised its entire schedule of dates set and the new dates for the class "F" circuit are: Estevan, June 21-22; Moose Jaw, June 23-26; Weyburn, June 28-29; Carman, Man., June 30-July 3; Portage la Prairie, Man., July 6-7; Dauphin, July 12-14; Melfort, Sask., July 15-16; Lethbridge, July 19-21; Red Deer, and Vegreville, Alta., July 22-24; Vermillion, Alta., July 26-28; Lloydminster, Sask., July 29-31; North Battleford, Sask., Aug. 2-3; Prince Albert, Sask., Aug. 4-7.

Ack Bounty On Coyotes

A resolution requesting that the provincial government place a bounty on coyotes was passed by the Alberta Provincial Horse Breeders' Association at Edmonton. It was claimed that coyotes were increasing in numbers and growing much bolder in parts of Central and Northern Alberta.

Asiatic Grass In Canada

A native grass of Asia, the Ramie plant, that has the same use as flax or hemp, has been grown in Vancouver from seed by Fred Gray. The grass, which attains a maximum height of seven feet in three years, reached the height of two feet in one season in Gray's garden.

Gravity is so great on the sun that an ordinary man would weigh two tons there.

HAWKS

(By Monly Miner)

Hawks are not good to eat. Shot-guns shells cost money, and with hawks as scarce as the hawk prostitutes tell us they are, so one goes out hunting any variety just for the sake of killing. The only one shooting any variety of hawks in Ontario are game birds. Some farmers are raising chickens, and the hawks they are shooting are the hawk attacking the chickens or other people. When they are shot, they are called "good" hawks on "bad" ones when they are caught in the act of killing chickens, turkeys, ducks and geese. When we shoot them the use of the gun and with the gun we go, so why such yelling about it.

To determine the good from the bad hawks we must catch holding blackbirds and pigeons, and hawk them attack them we shoot before they reach the bird market. What more can say can there be to determine what hawks should be controlled here. And then so much criticism about it, even when we get the gun and with the gun we go, so why such yelling about it.

The fact that hawks from the backache and rheumatic ailments, this woman decided to try Kruschen Salts in a last attempt to obtain relief from pain. She was surprised to find the salt had disappeared in a few months the backache had disappeared. Having made sure of the results she now writes as follows: "The results were beyond my imagination. In a few months I had no more pain. I had tried various remedies, but obtained no relief. I am now free from the dragging pains of backache.

Kruschen is an excellent diuretic. It removes all the body poisons.

When kidneys are restored to health, normal action, poisonous waste is properly eliminated, the blood stream is purified, and you get rid of all the salts and acids causing

Is Your Child Undernourished?

Your child may not be sick, but unless he is a noisy, rollicking, romping youngster—full of activity, energy and gaiety—he is probably undernourished.

Undernourishment does not mean lack of sufficient food. It means lack of certain elements in the food-elements that promote energy and growth.

Wapole's Extract of Cod Liver

contains these needed elements in just the right degree—vitamin A, vitamins—“that mysterious ‘something’ that makes children grow and keeps them of balanced year after year.

The World of Wheat.

By H. G. L. Strange
Director "Crop Testing Plan."

Canadian wheat in the long run is not paid for in money, but by the goods, commodities and services of foreign people.

Whenever, therefore, the flow of goods and products out of foreign countries declines, we may be quite sure that a corresponding decline will take place in the flow of Canadian and other wheats into those countries.

The League of Nations tells us that the export of goods and commodities from wheat importing countries has decreased during the depression years by about 30 percent. The sale of wheat from Canada and other wheat exporting countries has also decreased by approximately 30 percent. This, of course, is just what might be expected.

It is evident, therefore, that as the wheat importing countries of the world are able to sell more of their own goods, commodities and services, they will be able to purchase more Canadian and other export wheats.

It can be said, then, finally, that the welfare of the farmers of Western Canada depends very much on the willingness of the nations of the world to buy each other's goods. Canada, of course, must deliver full share of this buying from others if she is to increase her sales of wheat.

Gossip and Grumbles

A storekeeper being complimented on his honesty; yes, they gave him compliments instead of conduct medals.

One of the Village swain wondering what a fan dance looks like. See Sally Rand big boy sometime.

Constable Belshaw training for Banking activities. Playing Draft Clerk at the skating rink Friday.

A Scotaman wondering if it is all worth while. B. B. says, yes, it is, though it may take time, stay with it, Scottie.

George Lim being disgruntled because Friday's entertainment was not all Pee Wee Hockey. Never mind, George, Baseball is just around the corner, like prosperity.

Tom Tredaway on skates. Atta boy, Tom, you show them that you believe in supporting good causes.

George Bennie making town Monday via a sleigh. Tough going George, but sure conveyance these days.

The Dougal Crater looking for his dog team, Saturday. McGregor has no barriers, dogs or no dogs.

Frank Hopper looking for Mid Paddy put the tongue.

Harry Fitzpatrick says he likes to sell coal like wildfire. How's your bins, folks, need any black diamonds.

Stevey and Jackie Fleming doing horseplay stunts, last Friday. Jack was well to the fore while Stevey dragged in the rear.

Laughing Dick piloting Evan Gordon through the finals. Prizes for Evan and curtains for Dick.

Walter Hurt exhibiting a new model steam engine. The admiring group wondering if it works.

A rink of lady curlers left Tuesday noon for Calgary to play a friendly game with the North Hill Ladies. The rink comprised Mrs. W. Wood, Mrs. H. Ballam, Mrs. T. Tredaway and Mrs. J. Belshaw.

Saturday certainly vented its full energy to giving the district a real snow storm and in consequence roads (secondary) are badly blocked. Teams and sleighs will be made on conveyance for some time now.

Three rinks from Crossfield are taking in the Carstairs Spiel. D. Cameron, E. Gordon, F. Heywood, S. Heywood, F. Becker, A. Stevens, N. Johnson, D. Carmichael, Lee Ableman, M. Jones, C. H. McMillan and G. Johnson. The rinks will be skipped by Carmichael, McMillan and Cameron.
